

NEUTERING

We believe it is part of responsible pet ownership to have your pet neutered and as such we recommend neutering for all cats and dogs.

FEMALE DOGS

Female dogs come into season every 6-9 months for a total of 3 weeks at a time. Neutering means your dog will not come into season or be able to get pregnant. Neutering also helps prevent many medical conditions such as mammary cancer, womb infection and false pregnancy. Many people worry their dog will gain weight after neutering but with the correct diet and exercise regime this should not happen. If you are concerned about your pet's weight please see information on our weight clinics.

MALE DOGS

Neutering of male dogs reduces the risk of behaviour problems such as roaming, aggression and urine marking. It can also prevent medical conditions such as testicular cancer, prostate related conditions and anal tumours. If you have a giant dog breed, please discuss delaying neutering with our vets.

FEMALE CATS

Female cats come into season during Spring and Autumn and are in season every 2-3 weeks. Neutering not only stops your cat coming into season and being able to get pregnant but also reduces the risk of womb infection and mammary cancer.

MALE CATS

Neutering prevents behaviour related problems in male cats, such as roaming (which reduces the risk of your cat being involved in a road traffic accident) and urine marking. It also reduces the tendency for fighting, helping to prevent the transmission of diseases such as Feline ImmunoDeficiency Virus (FIV).

A vet or nurse will discuss recommended timing of neutering during your consultation.

- £75 ▶ If your kitten or puppy has already had their first vaccination
- £65 ▶ If your kitten or puppy is already microchipped and has already had their first vaccination

PUPPY AND KITTEN PACKAGE

 *Emergencies!*

In the event of an emergency, please contact either GLASGOW VET SCHOOL
OUT OF HOURS on 08458 502 080 or VETS NOW on 01412 377 676.

RCVS accreditation is a voluntary quality assurance scheme governed by the Royal College of Veterinary Surgeons (RCVS), who regulate the profession as a whole. To gain accreditation in the Practice Standards Scheme, the RCVS performs a rigorous inspection of the practice and its staff every four years. The inspection focusses on areas including hygiene, health and safety, equipment and delivery of high standards of veterinary care.

WHAT YOU GET

Your puppy or kitten's first visit to us is about so much more than just their vaccination. We believe that your new pet deserves the highest standard of care from the very beginning. Our package has been designed to give your new family member the best start in life.

Monthly premium spot-on flea and worm product which now includes lungworm cover as standard. Four doses are included, providing protection until your pet reaches 6 months of age.

£20 OFF

£20 off the cost of spaying or castration. Valid until your pet is 1 year old. This may be extended for some giant breeds after discussion with one of our vets.

VACCINATION

Vaccinating your new pet will provide invaluable protection against several potentially fatal diseases.

We vaccinate dogs against :

Distemper, Hepatitis, Parvovirus, Parainfluenza and Leptospirosis

We vaccinate cats against:

Cat Flu (Calicivirus/Rhinotracheitis), Infectious enteritis, Leukaemia

Once your new pet is old enough (8 weeks for puppies and 9 weeks for kittens), they can start their vaccinations - usually called the primary course. This consists of two injections, given 2 - 4 weeks apart. To find out more about our vaccinations and the diseases they prevent please visit our website tvcu.co.uk

PARASITE CONTROL

As part of our plan, your puppy or kitten will receive a spot-on preparation each month which protects against fleas, lice, mites (ear, mange and demodex) and worms (including lungworm for dogs).

To find out more about our parasite control programme visit our website at tvcu.co.uk

INSURANCE

Puppies and kittens are renowned to be mischievous in their first few years. Therefore it is important to have insurance to cover any unforeseen illness or injury.

As part of our puppy and kitten pack, we will give your new pet 4 weeks free insurance from one of the markets leading pet insurers. There's no obligation at the end of the 4 week period.

This gives you piece of mind in those first few exciting weeks.

MICROCHIPPING

It is important that your pet is microchipped so that they can be returned to you quickly if they become lost.

It is now a legal requirement to have all dogs over 8 weeks old microchipped and have their details kept up to date.

If you do not, you could face a fine of up to £500.
